New Features, Improvements and Fixes

New Features

1. Workforce Report **SRF310 Workforce Kiosk Registered User** report has been created to show people who have registered their mobile for the Workforce Kiosk. [#18655]

Improvements

1. Workforce Report **SRF308 Accommodation Discrepancy** has been updated to separate the arrivals and departures discrepancies into individual sheets.
2. Additional auditing has been added to cleaning setup including:
 - Clean Duration
 - Cleaning Run
 - Clean Types
 - Cleaning Days
 - Rooms allocated to Cleaning Run
3. Check-in and out actions performed using the **Rooms | Accommodation Arrivals** and **Accommodation Departures** pages in SAM now appear on the SAM **Accommodation | Audit** report, providing transparency into these key activities. [#19166]
4. The SAM **Rooms | Accommodation Arrivals** page has been updated to allow No Shows to be processed without requiring the person to be rescheduled. To mark the person the Reschedule Date must be removed before submitting.
5. Workforce Report **SRF309 Accommodation Optimisation** has been updated with a default future days of 45. The Owned Room Not Available calculation has been updated to reflect the calculation in **SRF202 Room Occupancy Visual**. [#19337]
6. Workflow has been updated with a new Approval Trigger. The Department Trigger will allow an optional approval step to be triggered when a traveller is in a specific Department.
7. Workforce Report **SRF224 Bookings by Date Range** has been updated to improve performance. [#19285]
8. The setup of Cleaning Days for new rosters has been updated so when the user clicks the Back button on the roster edit page, if the roster does not have cleaning days setup yet, they will be asked if they want to setup cleaning days.

Roster Clean Days setup

9. The SAM Parameter **SpotCleansEnabled** has been updated to allow configuration on a per camp basis.
10. SAM **Rooms | Cleaning | Cleaning Allocation** has been updated to filter the Cleaning Run and Room Type drop downs when a Camp has been selected.
11. Folio Travel document requests have been improved and documents should now load much faster (up to 60% faster in some cases).

12. The Workflow Task Panel search has been updated to improve performance.

Fixes

1. Fixed an issue with User access and restricted camp access. Users can now only access reports for camps assigned to them.
2. Fixed an issue where the PFN/PLN could be incorrectly removed when processing a Folio request.
3. Fixed an issue where Camp Email Notifications were sent to person's default camp, not the camp they were booked at. [[#19333](#)]
4. Fixed an issue where the Room Optimiser could incorrectly move bookings into Linked Rooms.
5. Fixed an issue in the Workforce Kiosk mobile application with sub-account selection. If the user is not associated with any other accounts, the change account option will be hidden to avoid confusion.
6. Fixed an issue with Workforce Report **SRF240 Billing** where the report was unable to be run even when selecting a single camp. [[#19266](#)]
7. Fixed an issue where the SAM **Rooms | Accommodation Arrivals** was unable to no show due to incorrect **AccommodationGracePeriod** calculation. [[#19437](#)]
8. Fixed an issue where the Workflow SAM Department Manager filter would send the request to an approver who was not selected. [[#19482](#)]
9. Fixed an issue where Cleaning Forecasts may fail when Room Types have a long code.
