New Features, Improvements and Fixes

New Features

1. The SAM Bulk Profile Update has been updated to allow attributes to be specified over a date range. For example, a Department may be permanently changed from a specific date, or it may be change for a date range only. This applies to Departments, Employers, Positions, and Cost Codes. [\[#18575\]](#)

Bulk Profile Attributes by Date

The screenshot shows the 'Bulk Profile Update' interface. It includes steps for selecting profiles, downloading an Excel document, and uploading the updated document. A red box highlights the 'Apply to bookings between' section, which contains checkboxes for 'Employer', 'Department', 'Cost Code', and 'Position'. Below these are date pickers for 'from' (24/07/2018) and 'to' (27/08/2018). A note states: 'For permanent change option, the change will be applied on bookings from the start date and to on'. Below the form is a table with columns for Status, Person, and Changes, showing a list of profiles with their current status and details.

2. Workforce Advanced Cleaning has introduced the ability to rerun the cleaning roster on a customer defined schedule so that any users of SAM Cleaning will now be able to see if there are rooms that are no longer required to be cleaned today based on booking changes to that room. This feature goes hand in hand with Advanced Cleaning solutions, however will also be available to non-Advanced Cleaning systems where rerunning the cleaning roster would already add cleans to a run, we have now enhanced the solution with the ability to cancel cleans. The clean itself does not get removed, however it is replaced with a status of "Cancelled".

Improvements

1. Additional auditing has been added for Departments, Employers, People Types, Room Statuses, and Positions. Audit information can be found on the SAM **Admin | Audit** page.
2. The Workflow Roster Document has been updated to allow the People Type to be hidden when the parameter **ShowPeopleType** is set to N. [\[#16717\]](#)
3. Workflow has been updated with a Transport Availability page. This will be available in the Links menu. If you would like to use this functionality please contact Vix Resources Helpdesk. [\[#19733\]](#)
4. Workforce Report **SRF308 Accommodation Discrepancy** has been updated to include the Checked In date time on the Arrivals sheet and the Checked Out date time on the Departures sheet. [\[#19953\]](#)
5. Workforce Report **SRF241 People Change Audit** has been updated to include when profiles are added. [\[#19922\]](#)
6. The SMS Onsite and Manifest searches have been updated to include the person's shift status. [\[#20078\]](#)
7. Workforce Report **SRF218 Changes Made to Arrival and Departure Bookings** has been updated to improve performance.
8. Workforce Report **SRF255 Automated Booking Status** has been updated with hyperlinks on the Summary page to allow easier navigation to the details.
9. Workforce Reporting Output Fields have been updated so date type fields do not show the time component. [\[#16429\]](#)

10. Workforce Report **SRF299 Returning Personnel** has been updated to split results by the relevant booking attributes, especially when attributes change part way through a booking. [#18885]
11. The SAM **Bookings | Check Availability** page has been updated to hide the **Only show clean rooms** checkbox. This option is only available when the SAM Parameters **UseAdvanceCleanDetails** and **AdvancedCleanDetailEnabled** are set to Y.
12. SAM Reports have been updated with a message to show if they will be deprecated in a future version. The message provides details of the replacement Workforce Reporting option.
13. The SAM **Rooms | Cleaning | Cleaning Allocation** page has been updated to allow multiple rooms to have a Spot Clean added in a single action.
14. Workforce Report **SRF189 Transport No Show Go Show** has been updated to include the Transport Code in its own column. The Transport column has been renamed to Description and a new column Special Charter has been added to show if the transport is a special charter. [#19996]
15. Workforce Report **SRF163 Arrival Departure 2** has been updated with Check In and Check Out columns to show the actual check in and out times. These columns will only appear if the SAM Parameter **ROD_Enabled** is Y. [#20074]

Fixes

1. Fixed an issue where a waitlist promotion may fail when extending a booking and the person's room is not available. [#18737]
2. Fixed an issue where the Roster Preview was not able to cycle rooms even though the actual roster run was correctly cycling.
3. Fixed an issue where Room Cycling would not work when the roster had a last night room move.
4. Fixed an issue where the **Not used in Report** option was not available on SAM Reports. This has been returned and means "All camps this user has access to". [#19877]
5. Fixed an issue with the Cleaning Days page where the shift visual did not include all days in the pattern.
6. Fixed an issue with Roster Previews where the roster included two or more on-site shift statuses (e.g. NS and DS). The preview may check transports different to those the roster would actually use, potentially leading to an incorrect indication that transports would be overbooked if the roster was run. The roster preview will check the same transports as the actual roster would select. [#20139]
7. Fixed an issue where the SAM Profile page when adding a profile. This issue only affected SAM users whose SAM profile view setting was **Single page** and did not affect users using the "Tabbed" profile view style. [#20187]
8. Fixed an issue where changing the filter on the results grid in **Admin | Accommodation | Bulk Room Update** would cause the next button to become inactive.
9. Fixed an issue where the Workflow **New Account** document would show the Login Name and Password fields when not at final approver stage if the document had been saved.
10. Fixed an issue with group bookings not completely removing bookings when they are released from the group booking. This issue could result in the group booking removing only the IN transport, leaving a dangling OUT transport (and room booking). If the group booking is unable to identify the OUT due to a breakage in the link between the IN and OUT transports, it will release the booking from the group booking but will not cancel any part of it. When this occurs, the user will be informed that they must manually cancel the booking using **Bookings | Remove**. [#20287]
11. Fixed an issue where the order of days on the SAM Availability Widget was incorrect when filtering the Dashboard by Camp.
12. Fixed an issue where using the **Send to another approver** in Workflow was not setting the approver correctly and requests could become stuck.
13. Fixed an issue where Workforce Report **SRF296 Cleaning Export** would error when using the latest version with SAM version less than 6.2.72. This has been updated to note the new minimum version.
