Upgrades are available at no charge for clients with an active Enterprise Subscription Agreement. To request an upgrade or to discuss license options, please [Contact Us](#).

New Features, Improvements and Fixes

New Features

1. SAM has been updated with the ability to swap the occupants of two rooms within a specified date range.
2. Workforce Report **SRF324 Rooms not cleaned in last x days** has been created to show rooms which have not been generated for a clean within the specified number of days. [\[#19735\]](#)

Improvements

1. SAM **Transport | Move** has been migrated to **Admin | Transport | Move** to better reflect it being an admin function.
2. Transport Move has been updated to improve performance. A progress bar has also been added. [\[#21993\]](#)
3. SAM has been updated with the ability to allow users to search for profiles by Mobile Number. This must be enabled on the individual user setup. [\[#20928\]](#)
4. The People Type page has been updated to show the Roster Duration on the search page. This allows easy visibility of the roster duration for all People Types.
5. SAM B2B Matchmaker has been updated to improve performance when selecting a person. [\[#21821\]](#)

Fixes

1. Fixed an issue where Camp Email Notifications would go to the wrong camp when the traveller had consecutive nights in different camps with Drive transports in between which are being rescheduled. [\[#19333\]](#)
2. Fixed an issue where it was possible for a Special Charter to be deactivated, even though it had bookings for today. [\[#21146\]](#)
3. Fixed an issue where it was not possible to view a roster preview in Workflow when the document was also creating a new profile.
4. Fixed an issue where it was not possible to reactivate a profile, via Workflow, where the person already had custom profile fields assigned to them which were required to be cleared on reactivation.
5. Fixed an issue where the **Allow split bookings** checkbox in SAM was disappearing when rescheduling a booking to be longer.
6. Fixed an issue with SAM **Rooms | Accommodation Arrivals** where no showing a person who had a split booking would cause the entire booking to be incorrectly cancelled.
7. Fixed an issue where changing an item in the Folio Processing tab would remove previous changes to the Shift Status. [\[#21885\]](#)
8. Fixed an issue with **SMS100 Accommodation Arrivals** where a room change was incorrectly ignoring the camp between one date and the next.
9. Fixed an issue where the **Bookings | Search | By Room** would incorrectly send the user to Room Locks even though the room was unassigned in either a Group Booking or Event. [\[#21956, # 21856, # 22018\]](#)
10. Fixed an issue where Transport Clusters would show the incorrect Transport Description when the transport had multiple future schedules.
11. Fixed an issue where it was not possible to approve a Folio request where the travellers booking was more than 365 days in length. [\[#22062\]](#)
