Vix is pleased to announce the release of **Version 6.2.92**.

- [Improvements](#)
- [Fixes](#)

[^ Upgrade Now](#)

Upgrades are available at no charge for clients with an active Enterprise Subscription Agreement. To request an upgrade or to discuss license options, please [Contact Us](#).

## New Features, Improvements and Fixes

### Improvements

1. The SAM Profile can be viewed in full when the profile summary has been opened in a popup. [[#23541](#)]
2. The Department and Cost Code fields on the Roster booking request have been updated so the Department is first in the list.

### Fixes

1. Fixed an issue where Workforce Report **SRF175 Roster to Excel** could timeout when running for a single month. [[#23448](#)]
2. Fixed an issue where the entire Event Crew Resource template was incorrectly locked. The spreadsheet has been updated to only lock the Event Crew Resource ID field.
3. Fixed an issue where email notifications from the Folio could contain the wrong Department or Cost Code if the booking had different details from the travelers profile. [[#23415](#)]
4. Fixed an issue where the LastBookingDate had been removed from the output fields for **SRF195 Profile Master Data**.
5. Fixed an issue where traveler names would not show in error messages during Event Management uploads.
6. Fixed an issue where the SAM Dashboard could error due to camps starting with a period.
7. Fixed an issue where it was possible for the SAM# to be created starting with a 0. [[#23515](#)]
8. Fixed an issue where Roster bookings could not be run when the new start date matched an existing IN transport. [[#23530](#)]
9. Fixed an issue where cleans could be reallocated incorrectly by the Night Audit when the parameter **SameDayClean** is set to N and Advanced Cleaning is in use.
10. Fixed an issue where Folio emails could be sent to an incorrect camp when back to back bookings existed for the traveler. [[#23219](#)]
11. Fixed an issue where Automation Robots could fail to process valid requests due to an incorrect check on the travelers Position.
12. Fixed an issue where the **People | Issued Equipment** page would error when selecting items on the second page [[#23577](#)]
