Highlights of this release

1

Workforce Reporting - Create a new admin role with the ability to provide access limits to scheduler jobs

A new Admin role for Workforce Reporting has been created with the ability to provide limits to scheduled reporting jobs. For more information please contact the VIX Resources support team.

New Features, Improvements and Fixes

New Features

1. **Workforce Reporting | Administration | Report Management** has a new feature, each report with a custom report is now identifiable by a new icon.
2. Workflow has been updated to allow a visual to be shown for the crew of the traveller. Please note this requires setup by Vix Resources in order to use. Contact the Vix Resources Helpdesk for additional information on how to use this functionality.

Improvements

1. Workforce Report **SRF233 Chart Manifest Upload Template** has been updated to split the person name into first name and surname.
2. SAM Roster Bookings has been updated to enable a roster swing to be split across rooms for non room owners. For more information please contact the VIX Resources support team. [[#26361](#)]
3. An improvement has been made to **SAM | Multiple Bookings** to make the **No Project** project field appear at the top of the list. [[#26244](#)]
4. Workflow impersonating functionality has been improved so that a full admin user can only have access to parameters and dashboards. [[#26695](#)]
5. The roles within Workforce Reporting have been updated and the existing Administration role has been renamed System Admin.
6. An update has been made to the SAM OptimiseRoomShuffle behaviour to ensure greater utilisation of rooms unoccupied aimed at reducing unnecessary wear and tear on the recently occupied rooms. [[#26630](#)]
7. Workforce Report **SRF175 Roster By Excel** report has been enhanced to include additional criteria "Roster By field". [[#26660](#)]
8. An update has been made to SAM to make the **Room#** field an auto wildcard search field within **SAM | Rooms | Room Lock | Room #**. [[#26652](#)]
9. Workforce Report **SRF344 Man Days By Employer** has been enhanced to include the employee number when "include people details" is selected. [[#26548](#)]
10. Workforce Report **SRF341 SAM Issued Equipment** as been enhanced to include equipment Due Date and the Profiles Next Departure Date. [[#26290](#)]

11. **SAM | Dashboard** has been enhanced to include an additional table which shows Accommodation by Department.
12. Workforce Report **SRF179 Transport Details** has been updated to include the report criteria **/excludedrive**. [[#26574](#)]
13. An update has been made to **Workflow | Folio Documents** to display the room clean status on the folio document processing grid when the travel request is within two days if the **Advanced Cleaning Application** is in use. [[#26452](#)]
14. An improvement has been made to **SAM | Booking | Multiple remove** page to allow users to select dates into the past. This feature is linked to the existing parameter '**AllowBookingPriorToday**'. [[#26259](#)]

Fixes

1. Fixed an issue on the SAM resources page where the automatic dropdown filter was not filtering out the pre defined room types. [[#26820](#)]
2. Fixed an issue where the Workflow parameter **TaskPanelMaxNumberOfDays** would disable the ability to search for pending workflows by request number. [[#26823](#)]
3. Fixed an issue in folio where the new profile name was not appearing in the task panel booking details field. [[#26815](#)]
4. Fixed an issue where SAM admin users were unable to delete a SAM Menu Set connected to a persons profile. [[#26742](#)]
5. Fixed an issue where Workforce Report **SRF175 Roster to Excel** was not generating any data. [[#26678](#)]
6. Fixed an issue in SAM where dismissed profile were able to be re-activated via the bulk reactivating function within event management. [[#26711](#)]
